

Date: 27 November 2012

Dear President Zuma,

How horrible poachers can be! Poaching rhinos has to be stopped! We wouldn't want our grandchildren asking what rhinos are. I don't want it to be the big four and not the big five. Someone should start a proper initiative to save the rhinos, and be very serious about it. There's one going on here when you put a small red horn on the front of your car, but I don't think these types initiatives work well. But why would these mean and horrible people poach these rhinos and try use their horns for medicine? Human fingernails are made of the same stuff so why can't they use them? Save the rhinos!

Yours most sincerely,
