

Dear President Zuma,

Rhinos are a wonderful blessing and should be treated as such. Poachers have been mercilessly killing rhinos for their ivory horns and stripping them of their beautiful feet for medicinal purposes.

It would be more than ideal for you to help put an end to this. If rhino poaching continues, our lifetime will witness the extinction of these majestic beauties.

From a young girl in America who pleads you to take a stand, I would be so happy to see the rhino population increase and flourish!

Warm regards,
Valentina Garcia
Atlanta, Georgia
