23<sup>RD</sup> FEBRUARY, 2013.

JACOB ZUMAH,  
PRESIDENT OF SOUTH AFRICA,  
PRETORIA - SOUTH AFRICA.

Dear Mr. president,

I am very elated to be given this great privilege to write to you this letter. Pleading with you to use your reputable position to encourage your pupils to put an end to the poaching or killing of the rhino in your country.

In my researched, I found out that rhino is an animal that can live for thirty years and above but human beings are killing them and they have been come endangered in the world.

I heard there was once an animal called dinosaur which was the biggest animal which ever live, but now there are no where to be found. Which means they have been eliminated by human beings.

Mr. president, I will like to share some important of animals to our live and the nation as a whole. Animals are very important creatures of God and they have really contributed to our lives. Animals can helped us in so many ways.

Mr. president, one way by which animals can contribute to our live is by the absorption of carbon dioxide in the atmosphere to prepare their food. They help to reduce the atmospheric carbon which may cause the depletion of the ozone layer. When ozone layer is depleted it produces a high amount of heat into the world.

Mr. president, animals are also a source of tourist attraction. When animals are preserved, and taken good care of, it attracts pupils to come from different places to come and see. It helps student also to improve upon their knowledge.

Mr. president, lastly I will end my view on animals.

P225

Serving as a source of income to a country. Animals bring money into the country through the tourist attraction. Pupils come to pay money before they are allowed to enter.

Mr. president, I will like to appeal to you to use your good office to influence the pupils to put a stop to the behaviour and rather preserve them.

Thank you,

Yours faithfully,

~~Patience Ndevu~~

(Patience Ndevu).
