Dear President Zuma,

I think that it isn't right to chop off  
Rhinoceros horns after you found  
out that their horns doesn't cure your  
medicines. If you like I can give you 4  
good reasons why 1 without their horns they can't  
take care of there babies. 2 They will not  
be able to eat 3 You don't really need there horns  
after you discovered it isn't any help for medicine.  
4 They will be extinct! So please  
stop using or cutting off horns or ever there  
wont be any more left.

Yours most sincerely,
