

Dear President Zuma,

Although I have never had the privilege to ever see such great animals such as a tiger, lion, rhinoceros, or an elephant in person, I greatly want to view each of these before I die.

The problem is that although I may have the opportunity to see these great animals, my children, grandchildren, and other generations of my family may not because they are constantly being hunted.

You may not have the ability to save them all but you can make a difference in the population of the rhino.

I am asking you to simply think of 2 places and 2 animals you would like to see before you die. Now imagine that the places have been destroyed and the animal has been killed and are gone forever. These places have not been destroyed by nature and the animals not by other animals.....both by human beings like you and I.

I ask for you to do your part so future generations of my family, other families, and yours may simply have the great and wonderful opportunity to view these magnificent creatures in their natural habitat.

Thank you for your time,

Chris Leal
