

#563

Date: 1/9/13

Dear President Zuma,

You know about it, though you haven't done anything. Even though they aren't pretty they are very important. Since except for meat eating mammals, they are top of the food chain and need to protect their cubs from males. Think about it like another animal cut off your hands and left you to die. That's what it's like for the orcs. You know what to do. Just do it.

Yours most sincerely,
