Dear President Zuma,

I heard about your address against poaching and there are millions of people behind you. If rhinos are extinct by the next generation the whole ecosystem will fall. Rhinos clear plants and grass so smaller animals can find their way. Also rhino dung helps plants by acting as fertilizer. I strongly suggest that you imprison poachers and when their time is done banish them from South Africa. Many rhinos have been slaughtered for their horns which have no medical value. So rhinos are getting killed for nothing. Stop animal poachers. Rhinos need a better and safer environment.

Yours most sincerely,
