Dear President Zuma,

I think we shouldn't harm rhinos. Why? They are almost extinct. I would like rhinos to live for ever so we can learn about rhinos and actually look at them. They only harm people only if you try to harm them. Rhinos should alive because they don't really do anything to people. They only eat, drink water, and sleep that's why people shouldn't harm them because they harm us!

Please help to save the rhinos!

Yours most sincerely,
