

01.15.13

Dear President Zuma, I think that you should stop poachers from hurting the rhinos. Their horns have no medicinal value. So there is really no reason to chop off their horns. Also you should create more harsher punishments for poachers. And when you let them hurt the mama rhinos the babies go looking for them and they die. So please try and help the rhinos. I want and so do many others want for the rhinos to make it one more generation and beyond.

From,

Elizabeth
