

Date: 1-10-13

Dear President Zuma,

The poacher's in your country are killing Rhinos
Thinking their horns are special. The horns
are just made of keratin. Keratin is what our
hairs and nails are made of. How would
you feel if you ~~tranquilized~~ tranquilized and
had your finger nails cut up. Don't they
know they're just lowering the population.
They are affecting other animals like too.
For example if Rhinos die who will
protect other animals, make a path
and dig a hole so when it rains
the animals around them will drink and

Yours most sincerely,

~~Food~~ will lay their eggs? If they keep
killing they will become extinct forever.
If you kill at a current rate they will
be gone the time I'm an adult (I'm 8).
