Dear President Zuma,

Please make poachers stop killing Rhinos! They go and cut the Rhino's horn off and then the Rhino dies. The horn is thought to be a cure for diseases like cancer. It doesn't do anything but kill Rhinos! Poachers keep killing Rhinos just for one thing!

I think you should beef up security around national parks. Also, you could move them

Yours most sincerely,

over ok

to a protected area. If you catch a poacher,
you should give them a warning. If they
do it again, you should put them in jail.
So please keep the Rhino alive for one
more generation!
