Dear President Zuma,

We need to save the rhinos! About two rhinos are being poached every day. There are only about 5,000 rhinos left in the wild. They are suffering their painful death right now. Their cubs look for their mothers and once they can't find them, they lose the will to live, and they die too. The horns have no medical value, but people believe they do. Please put the poachers in jail for at least 30 y.-life. Please include better border security, like luggage X-rays.

Yours most sincerely,
