Dear President Zuma,

I think potchers aren't being very thoughtful of themselves because they're still living things. Did you know that if a rhino gets killed or dies the baby will be lost and wonder where its mom went. Then it just gives up and doesn't eat or drink and eventually it would die? Also when potchers cut off their horns they die 2-3 days after because it would be able to take mud baths and they won't be able

Yours most sincerely,

(Turn over)
