Dear President Zuma,

Did you know that the average of 2 rhinos are killed through illegal and cruel poaching every day. The money ~~is~~ the horn is hacked off while the animal is still alive. Rhinos are very important part of the ecosystem. The closest relationship between a female and her calf was 4 years. You should stop poaching in Africa because when a mama rhino is killed her baby makes a sound that if a human hears it will haunt there mind forever. You could start by putting security cameras in the rhino's areas.

Yours most sincerely,
