Dear President Zuma,

do you like these rhino species. Do you want to make a difference.
Well I do, so I have a few reasons to stop this. First, these
poachers are killing these rhinos just because they want money.
Second, they lie and say it was cancer. They also take
the horns and leave them to suffer. I think you should have
scientists create a tiny ^{this might} _{take time} device to go on top of the horn that
tracks the horn. It would have to be put on really tight so
neither the rhino or the poachers can take it off. My other idea
is to put a electric wire on top of the fence so poachers
that are on the ground cannot get in the area. Do please
care for that species. I know you will try. One more
thing I let you want people to come to see the rhinos.

Yours most sincerely,
