Dear President Zuma,

Please do more to stop the poaching of rhinos. Rhinos are important because if they go extinct it will impact tourism alot. Remember, rino horn does not have any medicinal value. You could educate the kids in schools about it, so the poaching will not last as long and might eventually stop. Rhinos need their horns to do everyday things (self defense, helping baby rhinos, and many more). One way you could stop it is to put up security cameras.

Yours most sincerely,
