

#587

Date: 1-7-13

Dear President Zuma,

I did know that Rhinos break
thru dense bushes and forest and
make way for other animals. they
establish pools of water benefiting other
species such as frogs and insects
that need them to complete their
lifecycle. There endangered of going
extinct. Rhinos use their horns for
self defence. Rhinos use their horns
for guiding there younger ones.

I did know if you let all
the Rhinos die your population will decline

Yours most sincerely,
