Dear President Zuma,

I'm writing to you because I care about the Rhinos. I think we should stop poaching Rhinos because... Rhinos use their horns for self defense. I think to solve maybe one of the problems are to put 24/7 cameras around so if someone gets us they can take them away. Rhinos also use their horns for giving young ones if they didn't have their horns their little one can't survive. Lastly if they don't have their horns they could dig for mud and get rid of parasites and they could die.

Yours most sincerely,
