Date: 1-7-13

Dear President Zuma,

I stop poaching! First, I think you
should stop poaching rhinos because people
come to see rhinos and if there's no
people there's no money. Ever think about
that? Second, the rhino is good for
the environment. It eats plants and when
it poops the seed is planted and grows!
Third, Rhino Horns are Not Medicin!
Scientists have proven rhino horns
are exactly the same as finger nails.
How would you like it if you
got your finger nails cut off then bleed to death?

Yours most sincerely,
