Dear President Zuma,

I want you to do something about rhino poaching. You should let the people know that it has no medical value. Let the people know that two rhinos are being slaughtered and left to die every day. There was 128 killed in 2009, 333 killed in 2010, and 448 killed in 2011. The number of dead is growing and to think poachers just are selfishly killing them for their horns for money. Even if the rhino doesn't die, when its horn was taken they need it for self-defense and they use it to root for food. Rhinos have a huge impact on the ecosystem, remember when you save a rhino you

Yours most sincerely,

save the ecosystem
