Dear President Zuma,

I'm writing because I care about rhinos. I think you should make electric fences around the area, because two rhinos are killed everyday. They need their horns to protect them, and get food. When they lack of the horn and leaving them to bleed to death. What if you had to bleed to death that would hurt. They are also one of the rarest species alive. What if they went extinct? You need to save the rhinos.

Yours most sincerely,
