

July 2012

Dear President Zuma,

My name is Carter, I am one of the founders of One More Generation. I am writing this letter because of rhino poaching. Rhino poaching is something that people need to know about, and with your power we could make a difference. But if we don't get the word out, who will make a difference, who will know about the problem. Rhinos can become extinct within our life time, instead of the big five it could become the big four. That is why we need your help and power to stop this.

We can save  
Rhinos

Anybody can make a difference  
if we can you can to

Best Regards from the entire  
OMG Team

Carter
