

Your honorable President Zuma,

As a Belgium citizen who is devastated by the news about the rhino poaching (433 brutally slaughtered this year) I feel obligated to ask you, why don't you act like a concerned President should do?

Vote for a new law: Shoot to kill. Get the army involved. Do whatever it takes to keep the rhino's safe. If other African countries can do this, I'm convinced that South Africa can make this change to! I guess it only depends on how important this is for you? Do you want to defend Africa's beautiful legacy? Or are you so selfish that you couldn't care less?

As the President of South Africa, it is your duty to declare **WAR AGAINST THESE POACHERS** Show **NO MERCY** shoot first asks questions later! But do wake up before it is too late!

When people come to visit your country it is to see the **BIG FIVE IN THE WILD!** I'm convinced that if one of them were gone this would be an economical disaster for SA. So do the **RIGHT THING**, speak up and take action. Do whatever it takes but make sure that your country win's this **WAR against poaching.**

Make sure the whole world knows what rhino horn is made of, the same substance as a fingernail. **SPREAD THE WORD, BURN THE STOCKPILES** with international media to cover up the story!

When the world see's that it is burned they will believe it has no medical use at all, that it is a **BOGUS MEDICINE AND WHEN THE MYTH STOPS THE KILLING WILL STOP TO!**

Yours sincerely
Sermeus Ingrid
Belgium
