Dear President Zuma,

Since you are the president of South Africa, you need to save and protect rhinos. Already, rhinos are endangered because of their habitat loss and hunting. While arrests for Rhino crimes have increased in the past year, strong laws and consequences need to be put into place. You need to stop the poaching. It is true, that it is a mistaken belief that the Rhino horns have medicinal powers. What will we do without rhinos? Rhinos are an important part of their ecosystem. Other animals rely on them for example, birds need food when the Rhino walks.

Yours most sincerely,
